All in One CO2 Laser

Quality Pulse Technology

Higher Peak Power

Smaller Beam Size

Easier Operating System

For Your Beautiful Life

Fractional CO2 Laser System for All the Functions

Finexel is a more advanced fractional CO2 laser system based on quality ultra-pulse technology. There are 3 different functional modes such as fractional, vaginal, and CO2 surgical with each handpiece. This is the best solution for both skin and vaginal rejuvenation.

1 Higher Peak Power

High Peak Power based on Quality Pulse Technology for Less Thermal Damage and Faster Recovery

2 Smaller Beam Size

More Focused Laser Delivery with Min. 100um Beam Size for Less Pain and Better Effect

3 Easier Operating System

Convenient User Interface and Various Functions with Only 5-minute Learning to Use it for All the Skin Types

fractional scanner

vaginal applicator

Treatment Effects

- Skin Resurfacing & Rejuvenation
- Scar Improvement
- Skin Whitening & Lifting
- Pore Tightening
- Soft Peeling / Fine Wrinkle Improvement
- Vaginal Tightening & Rejuvenation
- Urinary Incontinence Improvement
- Labia Brightening
- Hemostasis, Coagulation, Evaporation
- Incision & Excision

Technical Specifications

- Wavelength: 10600nm
- System: Fractional CO2 Laser
- Mode: FRX(fractional) / CO2(surgical) / EVE(vaginal)
- Max. Power: 30W
- Pixel Energy: 5~300mJ
- Scan Area: Min.1x1 ~ Max.20x20mm
- Density: 0.1~2.0mm / Overlap: 1~10
- Laser Shape: Square, Rectangle, Triangle, Circle
- Beam Pattern: Standard, Alternate, Random, Scatter
- Electrical: 100~240V, 50/60Hz
- Dimension: 350(W) x 400(L) x 1000(H) mm
- Weight: 40kg (Max. Weight: 50kg)
